The System's Hidden Architecture

Multi-Channel Interaction

Procurement lifecycle logic is scattered across Web browsers, SOAP endpoints, and Batch channels. There is no single interaction surface.

Implicit Workflow Logic

No central BPM engine exists. Business logic is implicitly encoded directly within Java controllers, validators, and persistence layers.

State-Driven Navigation

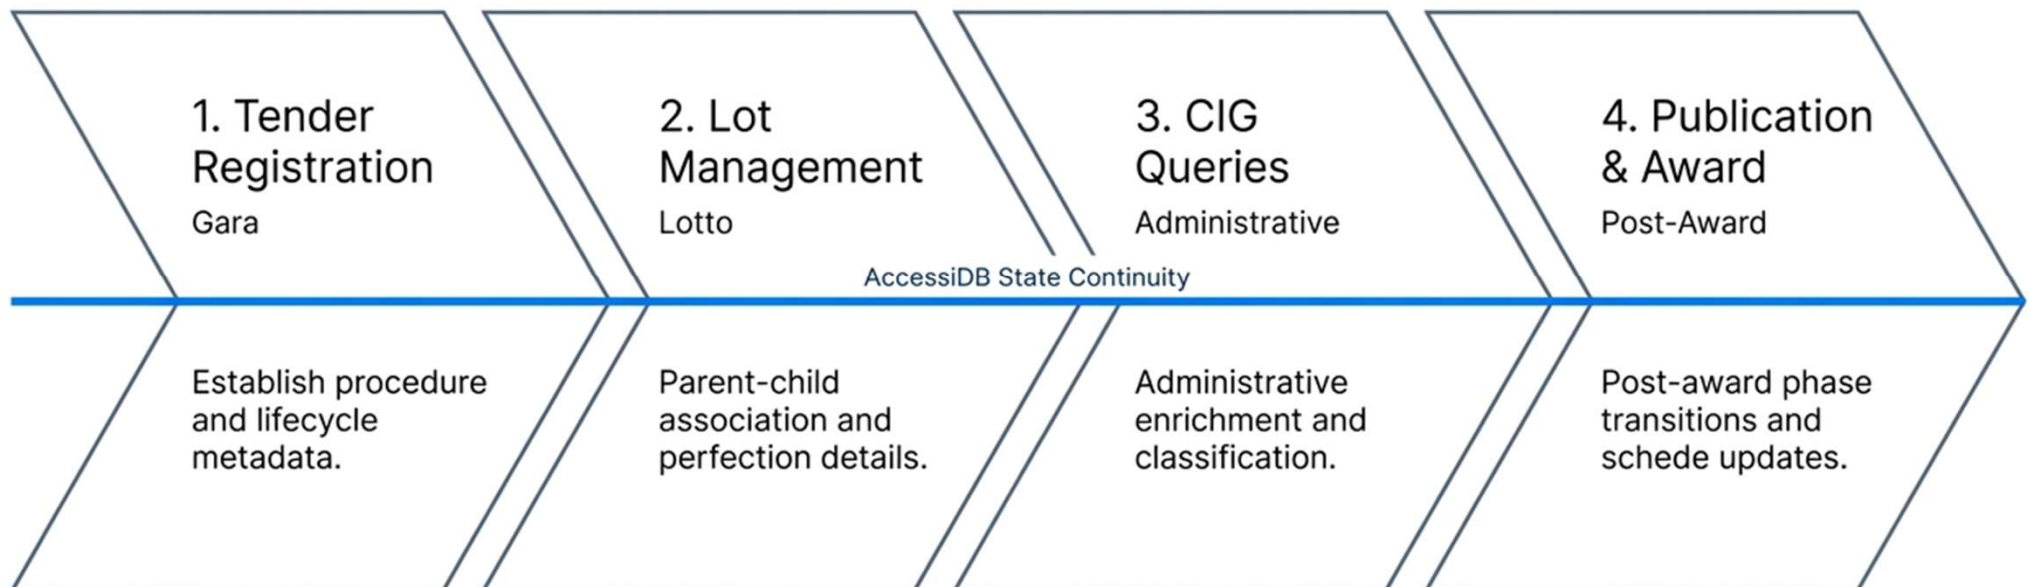

Progress is governed by underlying AccessiDB state rules, which strictly determine access to phase-specific "schede" (screens).

The Multi-Channel Interaction Matrix

Mapping the 9 discrete workflows to their execution surfaces.

	Web (Browsers/JSPs)	SOAP (Machine-to-Machine)	Command-Line Batch (XML)
Core Procurement	Servlet Paths (W1, W2, W3, W4)	SimogWSPDD (W1, W2)	
Data Sync & Ingestion		Aggregator Sync (W5) & TED Delta (W8)	Mass Loader (W9)
Security Enablers	Auth & Profile (W6)	WS Session Ticket (W7)	

The Core Procurement Lifecycle

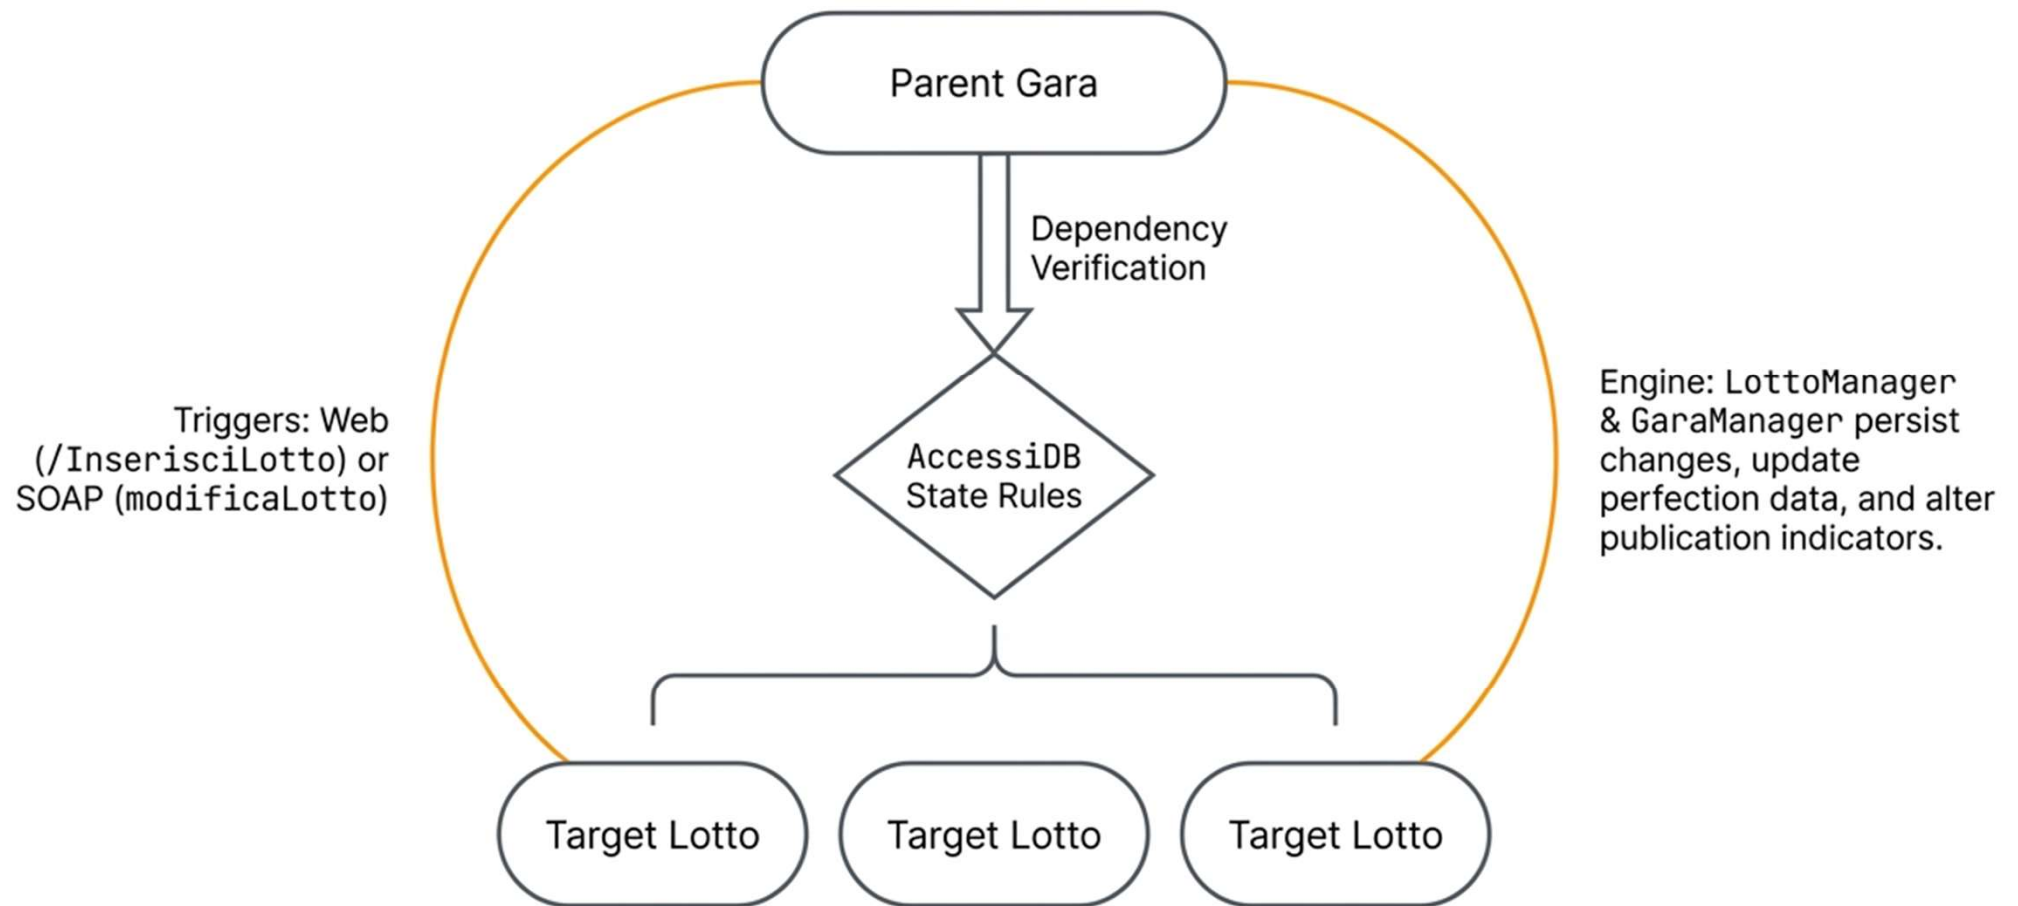

Initiating the Tender Procedure (Gara)

Workflow 1 Explanatory Flowchart

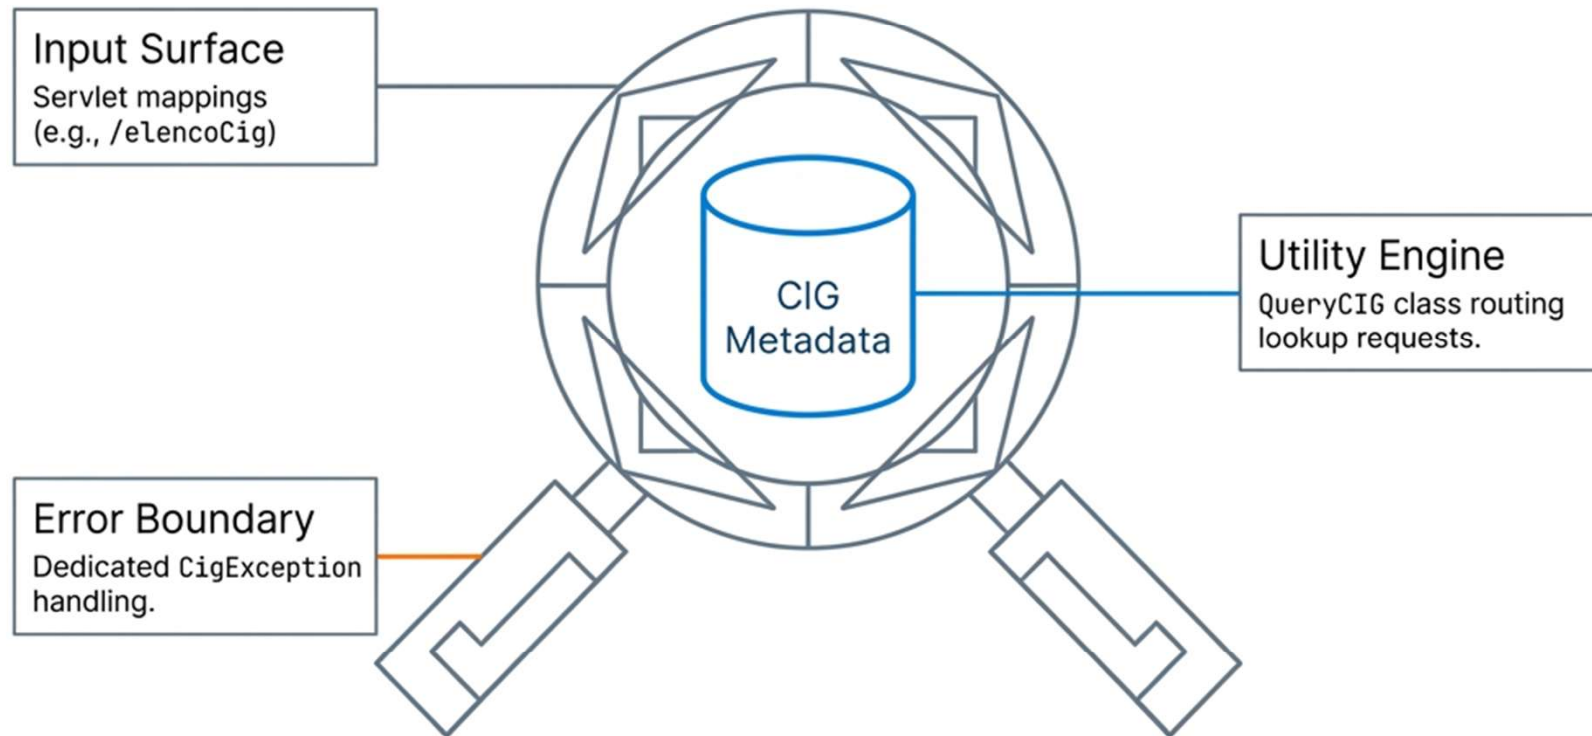

Lot Management and Structural Dependencies

Workflow 2: The Parent-Child Matrix

CIG Classification and Administrative Queries

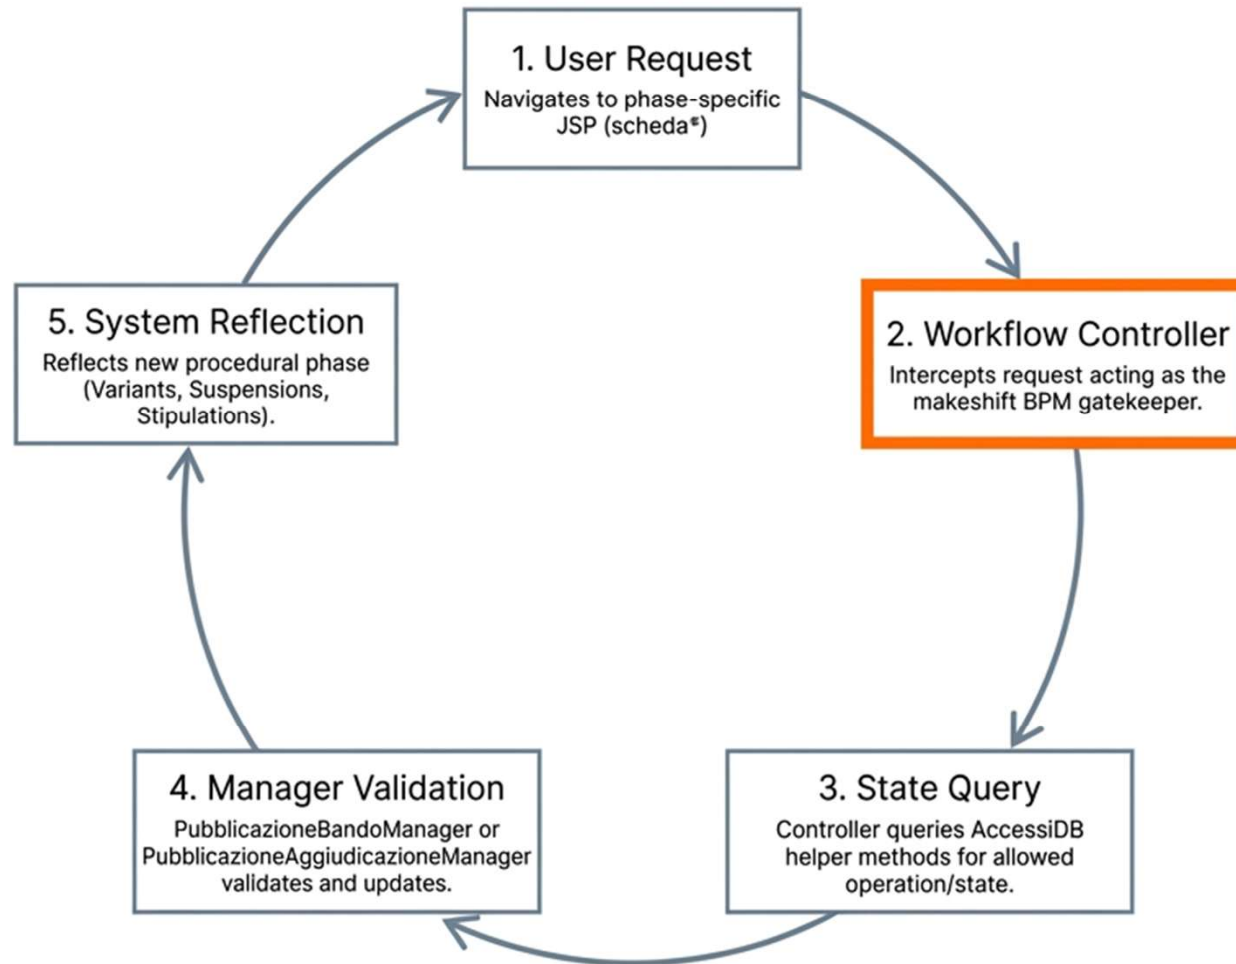

Workflow 3 Utility Mechanics

CIG handling represents a distinct, heavily utilized administrative business concern, supporting lookup and enrichment distinct from core lifecycle state progression.

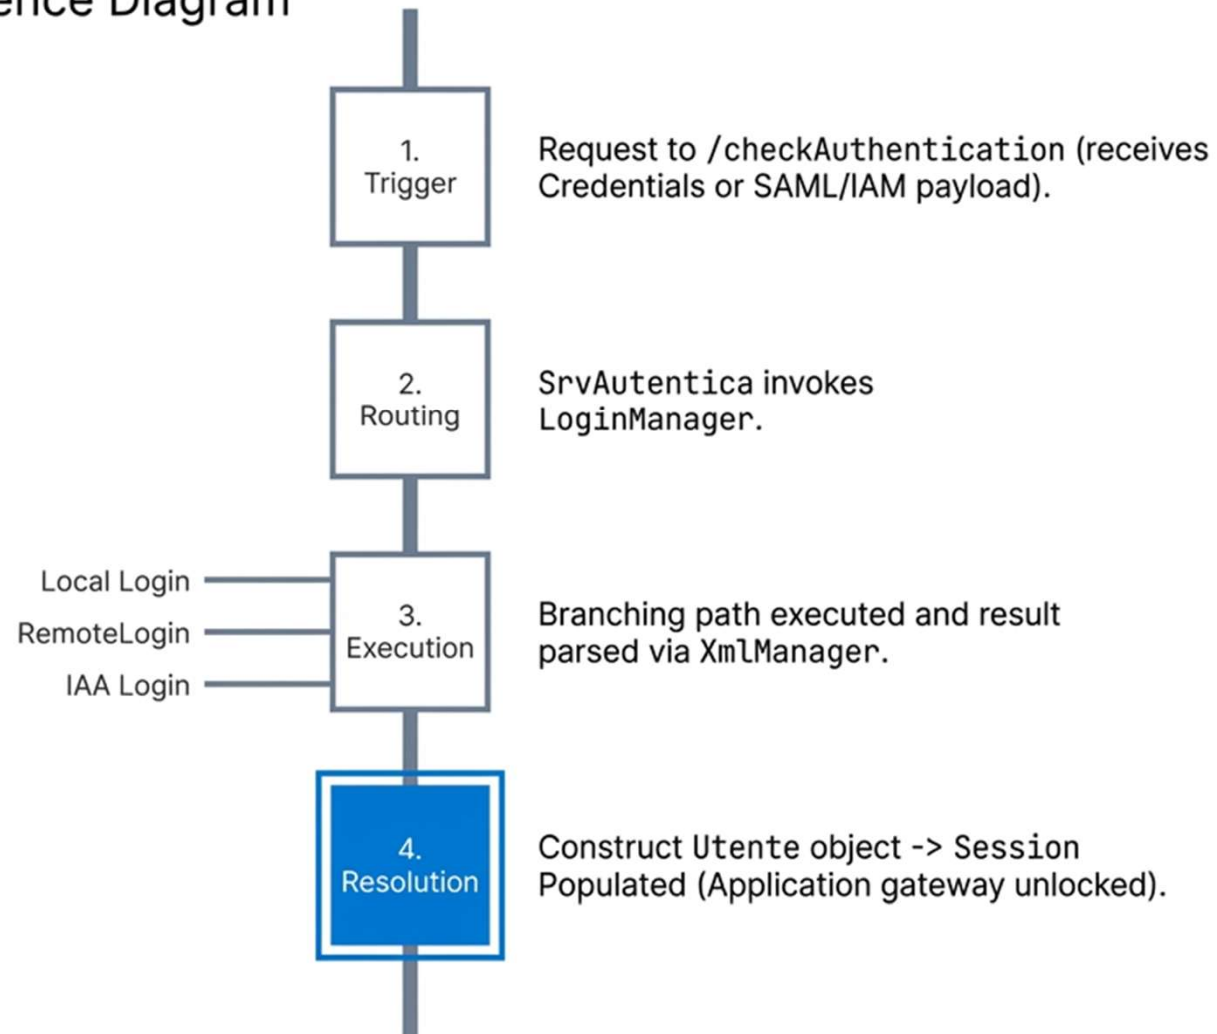

The 'Scheda' State Machine Framework

Workflow 4: BPM-less Orchestration in the Post-Award Phase

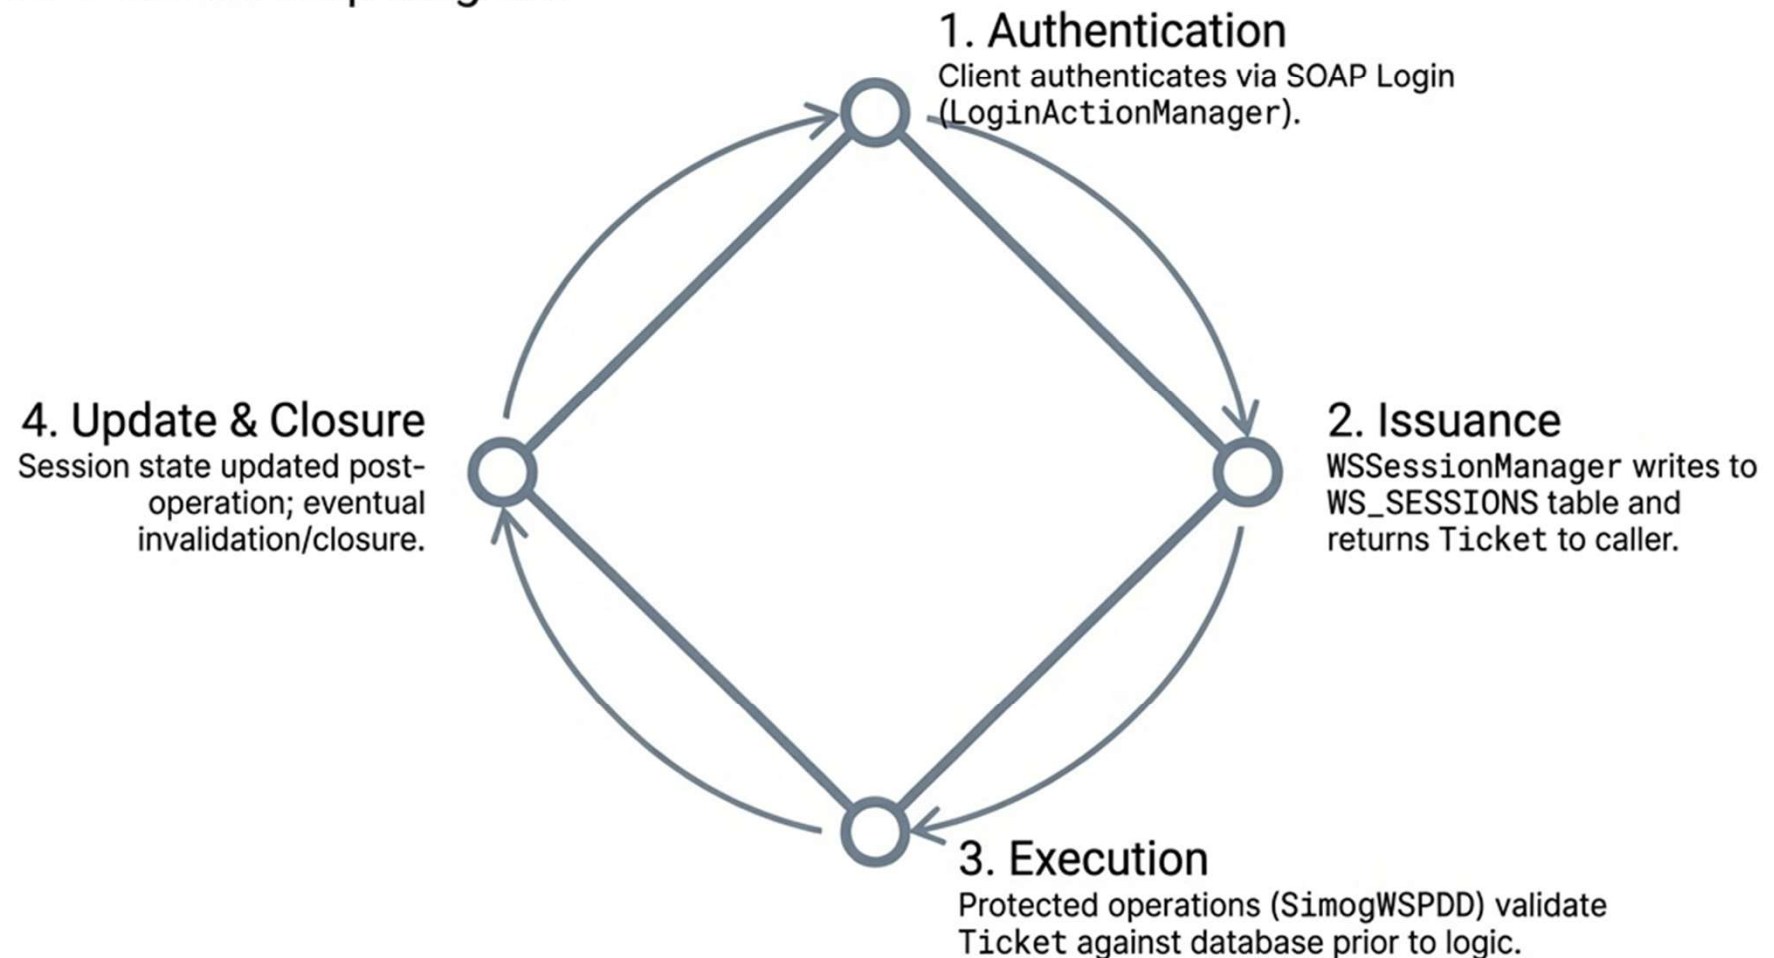

Human Security Enablers: Authentication Context

Workflow 6 Technical Sequence Diagram

M2M Security Enablers: WS Session Ticket Lifecycle

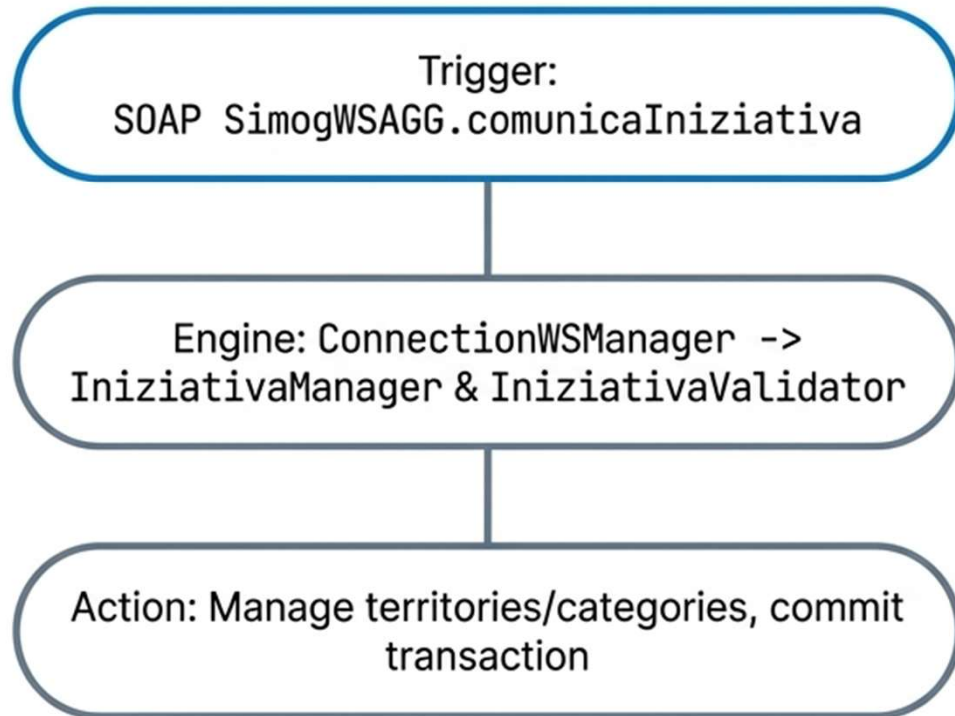

Workflow 7 closed-loop diagram

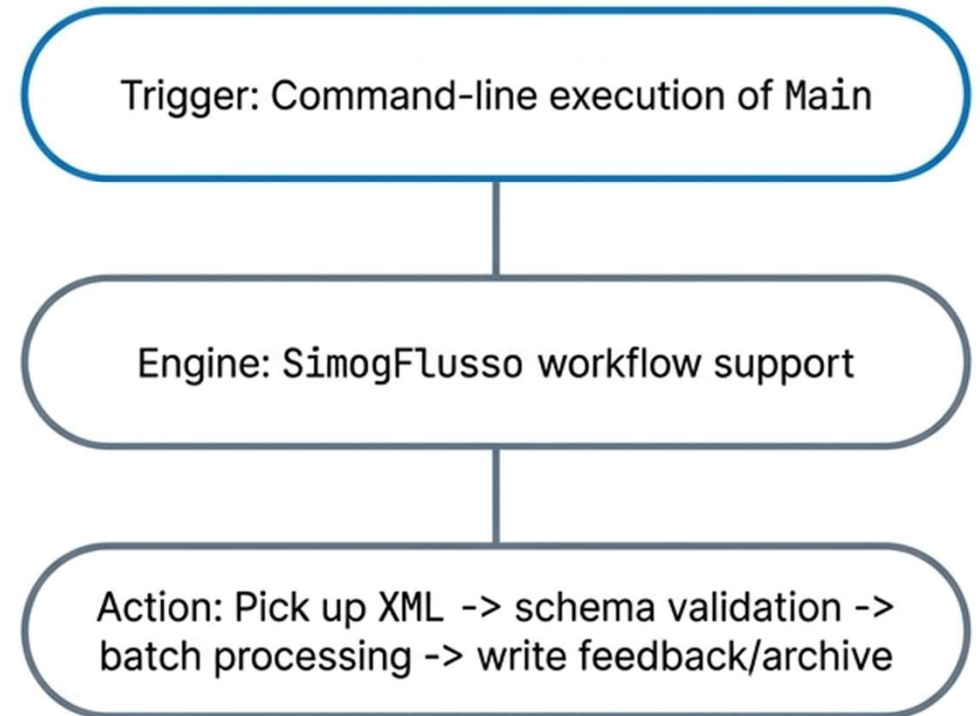

Inbound Data: Real-Time Sync vs. Mass Ingestion

Contrasting Workflows 5 and 9

Aggregator Sync (Workflow 5)

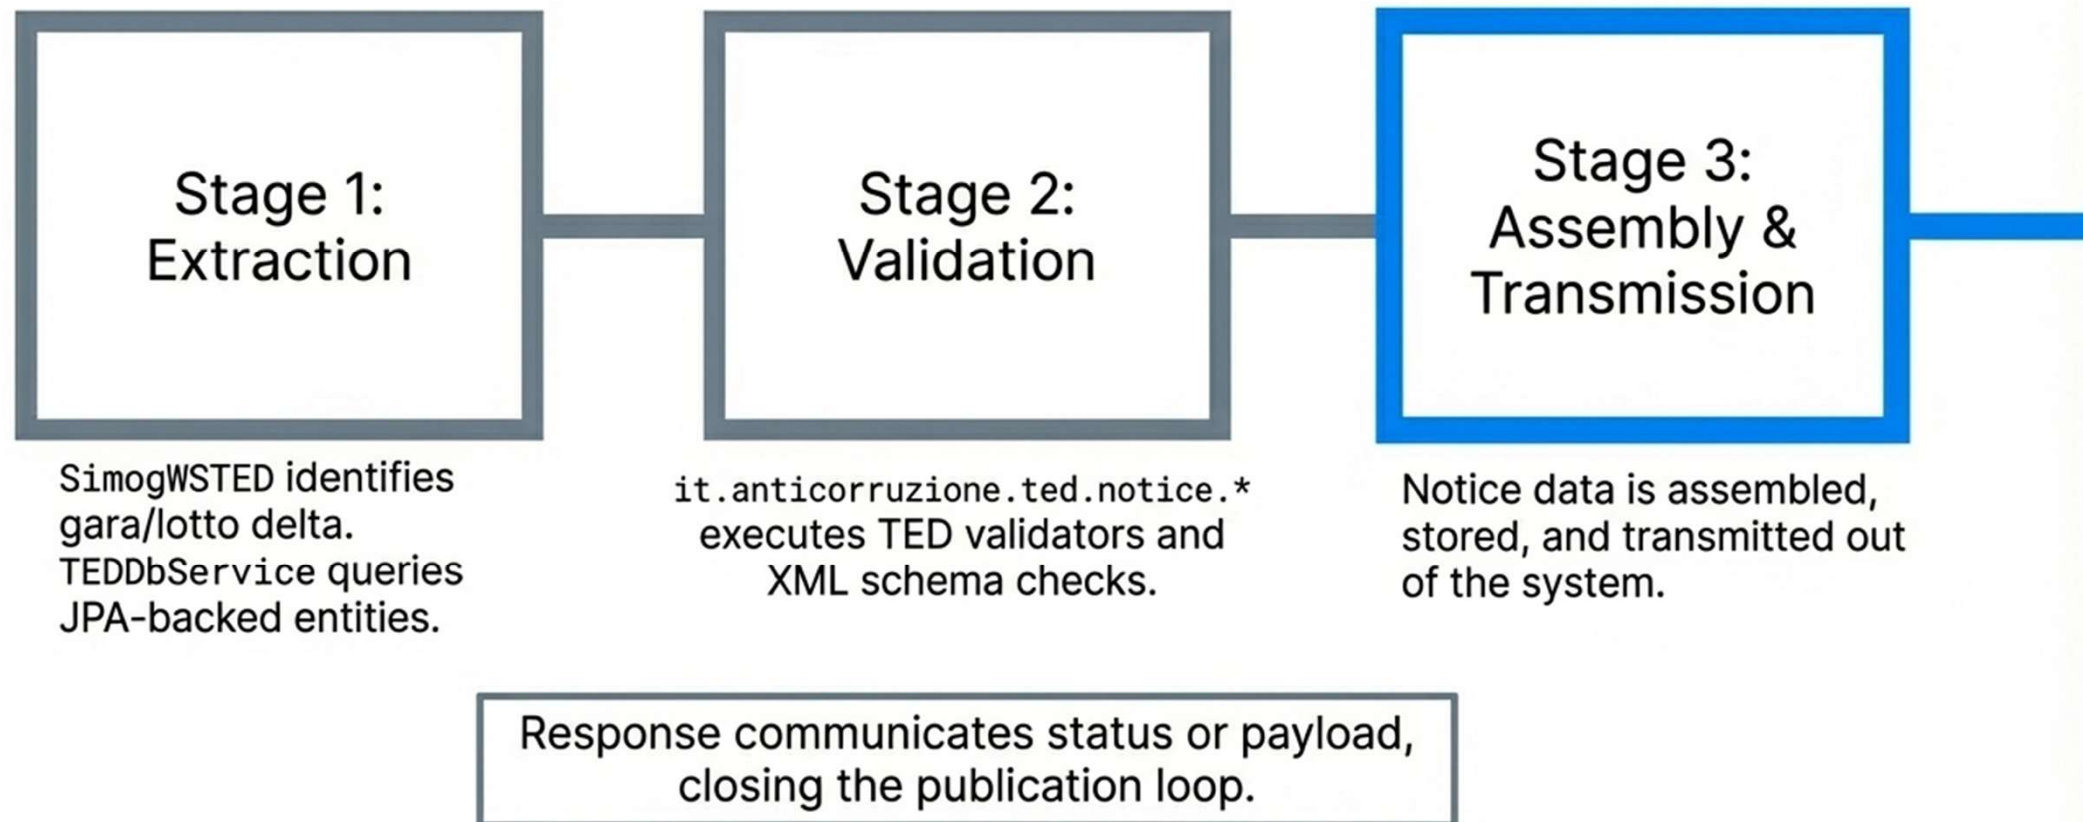

Mass Loader (Workflow 9)

Outbound Data: The TED Delta Pipeline

Workflow 8 external system boundary

Architectural Cross-Reference Matrix

Component responsibility cheat sheet

Core Component	Primary Domain	Workflows Powered
GaraManager	Procedure Persistence	W1, W2
LottoManager	Lot Lifecycles	W2
SimogWSPDD	SOAP M2M Operations	W1, W2, W7
SimogWSAGG / IniziativaManager	Aggregator Sync	W5
LoginManager	Web Auth	W6
SimogWSTED / TEDDbService	Outbound Publication	W8
Main / SimogFlusso	Batch XML Processing	W9

The Simog System Blueprint
